

“917 RACING” – Retro Cycling Kit

“Racing is important to men who do it well. When you’re racing, it is life. Anything that happens before or after that is just waiting.” Steve McQueen

The latest 917 Racing Cycling Kit continues the retro car racing theme of the previous limited edition Martini kit. The kit is based upon the all conquering 917 Gulf Racing Porsches of the 1970’s that won the legendary LeMan 24 hour race in Europe. A Porsche 917 was also famously driven by Hollywood star Steve McQueen. The number of his race car was number #20.

We have used the colours of the racing cars and the SMcQ racing number #20 as the central theme for the kit. And a bit of orange for the Dutchies amongst us!

Tinelli Performance Bikewear have been contracted to manufacture the kit once again due the excellent quality displayed in previous kits produced. The style will be the Aero Race-Fit..... see more at bottom of this doc for additional pictures of the kit, and technical details of materials and what you can do to confirm sizing.

YOU Need to Move FAST! - The closing date for orders is 8pm Monday 28th January so you need to move fast. The payment of your cycling kit needs to be completed by this date otherwise you will miss out. The expected delivery date is approx Friday 22nd March.

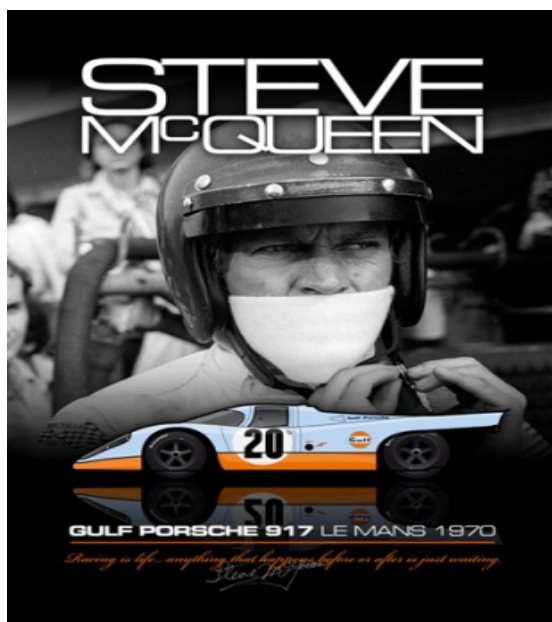

***** Be aware that the kit only comes as a complete kit package – this includes Jersey, Bibs, Gloves & Cap *****

The cost for the complete kit is \$225 incl GST

Payment Details –

- Name – DBC Rosenthal
- Bank Account – 557895
- BSB – 732249

Once you have paid in full please email your order through quoting your bank deposit reference, name, phone number, email address, sizes (Jersey, bibs, and gloves), shortened jersey etc to ozspudz@gmail.com .

If you have any questions don't hesitate to email Damian or Tim on ozspudz@gmail.com or you can talk to us at Costa Noosa after the group rides. One of us will be there on Tuesday, Thursday & Saturday mornings next week.

Tineli Aero Race-Fit Jersey:

The jersey is a tight fitting race jersey with 'Aerodynamic' waffle textured fabric for sleeves and side panels to create a turbulent boundary layer for enhanced aerodynamics! (It will make you go faster..... 5 watts faster compared to a standard jersey in wind tunnel tests). The remainder of the jersey is made from 140gsm QuickDry fabric for enhanced moisture management where it is needed.

The jersey provides a very snug fit compared with normal short sleeve cycle jerseys; it is a similar effect to wearing a skin suit. For those that would like to combine a little bit more comfort with snugness, and go up a size in the Aero jersey, there is the provision to shorten the length of the jersey front and back by 2.5cm or 5.0cm.

The jersey is only made in the Men's unisex sizing. The size range starts at XS and goes up to 4XL. It is also available in 3 kids' sizes; 128 / 140 / 152. N.B the kids size 152 is equivalent to a women's size XS (or size 6)

Sizing for the Aero Fit:

To try on an Aero Jersey for sizing, please feel free to drop into Le CycloSportif @ Noosa Junction where there is a range of sizes in the normal length, as well as a range of sizes in the bibshorts. Contact Jo at the Tyneli Office on 5474 9345 if you would like to try on a jersey for size with a shortened length.
